

KEISER STRENGTH

INFINITY SERIES FUNCTIONAL TRAINER ATTACHMENTS

**NOT JUST BETTER MACHINES,
BETTER SCIENCE**

The Keiser Functional Trainer features two arms, which can be adjusted for virtually any training position and can be fitted with a variety of cable attachments specially designed to enhance workouts.

KEISER®
BECAUSE...
**'GOOD
ENOUGH'
ISN'T.™**

FUNCTIONAL TRAINING

What's the key to Keiser's success with groups like firefighters, NASA, professional athletes and the military? It's an approach built on functional training, allowing users to train at the speed they perform their jobs. True functional training requires training at speed – something that can't be done with a typical strength machine. Only Keiser's pneumatic resistance isn't slowed down by gravity.

INFINITY FUNCTIONAL TRAINER ATTACHMENTS

3' CHOP BAR

- Constructed of lightweight aluminum tubing with knurled grips
- Heavy-duty bearings and military-specified straps combine to allow for maximum freedom to move the bar with minimal wear at the attachment point

BACK/LAT STRAP

- Impact-resistant body with soft and grippy rubber
- Over-molded as one unit with military-specified straps
- 2' long from handles to D-ring
- 4' from handle to handle

CABLE HANDLE

- Impact-resistant body with soft and grippy rubber
- Over-molded as one unit with military-specified straps
